# Elly – Gynaecological / urological chair

*Made in Italy*

**ELLY** is a chair for gynecological/urological use. Chair with a compact and modern design that meets the needs of professionals who are looking for innovative, practical and functional tools as well as those of patients who want comfort and relaxation in a situation of temporary embarrassment.

Very suitable for use in environments with limited space.

**Elly** is available in four versions: 1,2,3,4 motors with independent lifting, back, leg and Trendelenburg movements (trendelenburg is not available in the version with 1 electric motor).

Structure in high quality steel completely painted with epoxy powder with antimicrobial characteristics.

The electric controls are managed by a push-button panel and only the lifting command is controlled also by foot control (on the version with 1 electric motor there is only the foot control).

The standard equipment includes a stainless steel liquid collection bowl, pedal control for the electric lifting management and control panel for versions 2,3,4 engines.

The base is available both fixed and on wheels (2 with brake and two free) to allow the movement of the chair and in order to perform with the utmost comfort the sanitation of the work environment.

Movements with electric motor in low voltage (linear actuators 24V-DC) and with gas pump: the lifting is in all versions electrically managed while the other movements can be managed even with gas spring lockable in the necessary position manually operated.

Thigh support in polyurethane foam with double adjustment on chromed support with ergonomic shape.

Rotatable and removable armrests, seat, back and leg are upholstered in class 1IM fireproof sky, antibacterial, antifungal, disinfectable and resistant to wear.

The trendelenburg function is available on all versions except for the version with 1 electric motor.

***Numerous accessories are available to increase the functionality of the product (see accessories list).***
